Professional profile

Looking for internship

I recently completed my HSC from KHURSHEED College, I have developed a strong command of HTML, CSS, allowing me to create visually appealing and responsive web pages. In addition to my education, I also persuaded an English language course from Educator English language center in 2021 to enhance my communication skills. While I am a beginner in Java Script, I am enthusiastic about expanding my knowledge and skills in this programming language. I am excited to apply my technical abilities and passion for learning in a challenging internship position to further develop my professional growth
